# Bram Noffels

**Data Analyst · Python Data Pipelines · OSINT & Fraud Analytics**

Antwerp, Belgium · noffels.bram@gmail.com · github.com/3mm4nu3l

## PROFILE

Analyst with six years in financial operations, fraud and KYC investigation, risk and compliance, for PayPal, Klarna, Worldline and Vodafone Business accounts. I build Python data pipelines that pull from public APIs, unit-test their own maths, and report uncertainty instead of hiding it. My open-source work on GitHub includes Project Hannibal, an OSINT and orbital-awareness terminal pulling from NASA/JPL, SatNOGS and Space-Track.

## PROJECTS

**Project Hannibal**: receive-only OSINT and orbital-awareness terminal (Python, multi-module, 2026)

- Integrates NASA/JPL, SatNOGS, Space-Track, CelesTrak, N2YO, FRED, Yahoo Finance and SEC EDGAR through one network layer that does secret masking, caching, rate limiting and retries.
- Planetary-defence module: impact exclusion for any asteroid from JPL close-approach data, deferring to JPL Sentry. Reproduced Apophis's 2029 pass at 38,011 km.
- Satellite reception analysis with 95% Wilson intervals: 2 of 148 military objects still heard over Antwerp.
- Security: PBKDF2 key gate, Fernet-encrypted logs, OS keyring for credentials. Seven offline test suites.

**Walkman**: terminal media player for Android (Python, curses, mpv, yt-dlp, 2026)

- Cut audio-only data use by replacing a 1000 MB read-ahead buffer with 48 MB and capping bitrate. Measured 124–127 kbps on device.
- Backup-first installer: SHA-256-verified payloads, on-device self-test, one-command rollback.
- Software 3D renderer written from scratch: z-buffer, back-face culling, Lambert shading, adaptive frame skipping.

**Macroeconomic Inflation Transmission Engine** (Python, statsmodels)

- Tracks inflation transmission from FRED and Yahoo Finance data. Expanding-window 90th-percentile thresholds avoid look-ahead bias, and Breusch–Godfrey selects the HAC lag.

## EXPERIENCE

**Financial Risk & Debt Recovery Specialist / Technical Support**, Concentrix Portugal, Porto — Mar 2026 – Sep 2026

- Financial risk and debt recovery on the PayPal account. Technical support on the Tandem Diabetes Care medical-device account.
- Passed the internal training and technical-systems certification exam.

**B2B Technical Support & Fraud Analyst**, Concentrix (Worldline / Vodafone Business) — 2025

- Fraud analysis and B2B technical support for payment and telecom business clients.

**Fraud & KYC Investigator, Account Manager, Digital Marketing**, Foundever Hellas (Klarna) — May 2023 – Feb 2025

- Fraud and KYC investigations, account management and digital marketing for a buy-now-pay-later provider.

**Cybersecurity Support**, TP Hellas (Norton Antivirus) — 2022 – 2023

**Customer Service**, Teleperformance Lisbon (Omnipod medical devices) — 2021 – 2022

**Earlier:** sales and customer service at Soleo (2019–2021) and Yource Bulgaria for Bofrost (2024–2025); retail at Philips Light Gallery and Delhaize, Kuurne (2014–2017). Military service, Belgian Army.

## SKILLS

- **Data & analysis:** Python, pandas, NumPy, statsmodels, SQL / SQLite, data pipelines, ETL, REST APIs, JSON, CSV, econometrics (HAC, threshold regression), statistical intervals, data visualisation (matplotlib)
- **Engineering:** Git / GitHub, pull requests, unit testing, PyInstaller, Linux, Windows, Android / Termux, curses terminal UIs, caching, rate limiting, pipeline automation
- **Security & integrity:** secrets management (OS keyring, masking), PBKDF2, Fernet encryption, SHA-256 verification, audit logging
- **Domain:** OSINT, fraud detection, KYC, financial risk, debt recovery, compliance, satellite and orbital data, AI-assisted development

## EDUCATION, LANGUAGES, VOLUNTEERING

- **Don Bosco Technical Institute**, print media and graphic design · 2017 · graduated with honours, highest in class
- **HOWEST University of Applied Sciences**, Bruges · teacher training, techniques and electricity
- **Languages:** Dutch (native), English (fluent), French (limited), German (basic)
- **Volunteer bar manager**, Bouckenborgh Park, a charity for street children · since 2020 · runs the bar at events of 500+ people
